FINAL

Last-two-weeks kelp & alfalfa feed

AVAILABLE SIZES

300 ml · 1 L · 2.5 L · 15 L

AT A GLANCE

RATE	**1 ml/L**
WINDOW	**Last two weeks of flower**

WHAT IT IS

FINAL is Ascophyllum and Durvillaea kelps with alfalfa extract, humic acid and vitamin B1, made for the last two weeks of flower. It was one of the first products in the range, built 26 years ago.

HOW IT WORKS

Rather than cutting the feed in the final fortnight, FINAL keeps the plant fed with two cold-water kelps and alfalfa extract through the last two weeks of flower. Humic acid may increase micronutrient uptake.

DIRECTIONS

Rate	1 ml/L
Timing	The last two weeks of flower
Frequency	Weekly, at each reservoir change
Mixing	Add to the made-up nutrient solution and stir through

GUARANTEED ANALYSIS

Total nitrogen (N)	**0.0232%**	Soluble potash (K_2O)	**0.1228%**
Available phosphate (P_2O_5)	**0%**		

As printed on the US product label.

DERIVED FROM

Ascophyllum nodosum and Durvillaea potatorum (seaplant extracts), Medicago sativa (alfalfa extract)
Also contains: 0.075% humic acid (from leonardite); 0.054% thiamine hydrochloride (vitamin B1)
