WHAT IT IS

FLORIGEN is the flowering partner to GROIGEN: Southern Bluefin Tuna hydrolysate, seawater and Porphyra red seaweed, applied as a foliar spray in early flower.

HOW IT WORKS

Applied straight to the leaf, it delivers organic nitrogen from fish protein with ocean minerals and seaweed amino acids. Spray early in flower and avoid wetting dense flowers later in the cycle. Contains fish.

DIRECTIONS

Rate	20 ml/L in the sprayer
Timing	Flower weeks 1 to 4
Frequency	Every 5–7 days
Mixing	Spray thoroughly with the lights off. No need to reduce your base fertiliser
