OOZE

Late-flower molasses & seaweed feed

AVAILABLE SIZES

300 ml · 1 L · 2.5 L · 15 L

AT A GLANCE

RATE	**2.5 ml/L**
WINDOW	**Flower weeks 5–8**
PAIRS WITH	**PHAT in weeks 3–4**

WHAT IT IS

OOZE is molasses with Ahnfeltia and Laminaria seaweed extracts, boron, molybdenum, humic acid and vitamin B1. It takes over from PHAT and runs through the back half of flower.

HOW IT WORKS

Molasses supplies natural sugars. Ahnfeltia, a red seaweed, and Laminaria, a brown kelp, bring polysaccharides and trace minerals, and boron and molybdenum are trace elements plants need in flower. It runs alongside the base feed to support plant health and nutrient uptake late in flower.

DIRECTIONS

Rate	2.5 ml/L
Timing	Flower weeks 5 to 8 (standard schedule)
Frequency	Weekly, at each reservoir change
Mixing	No need to reduce your base nutrient

GUARANTEED ANALYSIS

Total nitrogen (N)	**0.306%**	Soluble potash (K_2O)	**2.4573%**
Available phosphate (P_2O_5)	**2.337%**		

As printed on the US product label.

DERIVED FROM

Molasses, Ahnfeltia plicata and Laminaria japonica (seaplant extracts), boric acid, sodium molybdate
Also contains: 0.075% humic acid (from leonardite); 0.054% thiamine hydrochloride (vitamin B1)
