PAIRS WITH	**SEAWEED in veg**

WHAT IT IS

SEAFUEL is cold-processed Southern Bluefin Tuna hydrolysate and southern bull kelp extract with 0.075% humic acid. It is used weekly through the bloom phase.

HOW IT WORKS

The tuna hydrolysate supplies organic nitrogen, amino acids and oils, Durvillaea kelp adds alginates and trace minerals, and humic acid may increase micronutrient uptake. Run SEAWEED through veg and switch to SEAFUEL for flower. Contains fish.
