WHAT IT IS

ULTRA is Ascophyllum kelp and alfalfa extract with humic acid and vitamin B1. It runs for the first two weeks after the switch to 12/12.

HOW IT WORKS

The flip is a big change for the plant. ULTRA sits on top of the base feed through that transition, supplying cold-water kelp, alfalfa extract and trace minerals to support plant health and nutrient uptake while the plant moves into flower. Humic acid may increase micronutrient uptake.

DIRECTIONS
